

Product description

Shann TAC 20 is a universal, environmentally friendly very fine spray adhesive for use on most construction and industry materials.

Material

SBR polymer mix

Properties

- Odourless
- Environmentally friendly
- Extremely powerful
- Very fine spray pattern
- For universal use
- Ready to use

Areas of application

For gluing all types of carpet, insulation and rubber materials

Instructions

Remove any moisture and grease from the surface being glued. Gently spray the contact adhesive onto both surfaces being glued. The ideal distance between the surface and the spray gun is 30 cm. Try to apply the glue in a single layer. Bring the surfaces together after 2-4 minutes and press or roller firmly. Wait at least twice as long to glue the surfaces together if the layers applied have overlapped. Check thoroughly to see whether there is sufficient contact between the glue layers if the surface is porous.

Apply an extra layer, if necessary.

Available forms

Spray can 500ml

Pressurised cylinder 17l

Colour

Transparent

Surface

All surfaces should be dry and free from grease and dust.

Safety recommendations

See safety information sheet

Technical data

Properties	Specification
Processing temperature	+5 to +40 degrees
Temperature resistance	-40 to +80°C
